EXPERIENCE

Services Company

Fullstack Developer II

November 2025 - Present

Entertainment Technology Partners

Web Developer

December 2022 - November 2025

Orlando, FL

- Architected and led the full-stack development of the updated 'knw' (real-time event analysis) platform, designing the frontend interfaces, backend APIs, database schema, and cloud infrastructure.
- Spearheaded the enterprise web infrastructure migration for a suite of brand sites from WordPress to a modern stack (Next.js, Vercel, Sanity CMS), architecting a multi-brand monorepo and shared custom component library for a growing suite of interactive, animated, and content-driven sites.
- Achieved significant performance & SEO gains, reducing site response times from about 1900ms to as low as 234ms, and reduced operational costs by replacing legacy hosting.
- Established and managed DevOps CI/CD pipelines and cloud infrastructure using AWS, Vercel, Docker, and GitHub.
- Led website design initiatives (Figma), created self-service CMS tools to empower the marketing team, and mentored other developers on technical best practices.

The Child and Adolescent Health Measurement Initiative

Intern

September 2020 - July 2021

Remote (Baltimore, MD)

- Supported upgrading of existing Wordpress site to Sitefinity MVC Model by implementing and improving inter-active web elements with HTML5, CSS3, and JavaScript.
- Assessed operations, documentation, and health data sets to improve accuracy and productivity.

EDUCATION

Johns Hopkins University

Computer Science B.S., Visual Arts Minor

Universitat de Barcelona/IES Abroad: *Spring 2022 Semester Abroad*

May 2022

Baltimore, MD

TECHNICAL SKILLS

Languages

Currently Using: *JavaScript/Typescript, Go, HTML5/CSS3*
Familiar With: *PostgreSQL*

Technologies

Next.js, React, Remix/Hydrogen, TailwindCSS, Motion, GSAP
Flutter, iOS & Android, Sanity/CMS, Vercel, AWS

Tools & Practices

Git, GitHub, Headless CMS', Jira, GraphQL, groq, CI/CD, SDLC, System Design

Marketing & Design

Google Analytics & Search Console, Figma, Lightroom/Photoshop

MOST RECENT PROJECTS

Aquaridex

Next.js/React, TailwindCSS, JavaScript/Typescript, AWS, Figma

Q4 2024 - Present

[Link](#)

- Collaborating on the development of a comprehensive wiki and data portal for aquarium hobbyists, researchers, and retailers, utilizing Next.js, TailwindCSS, and graph database technology.
- Leading frontend development and UI/UX design (Figma) to present complex aquatic data in an intuitive, accessible, and easily digestible format.
- Implementing accessible design patterns, dynamic theming, and a secure user portal for community-driven content management and updates.
